

CARES Act 5-year comparison period revenue calculation instructions for crab harvesters:

1. **Select a time period in 2020 (from 2/1 through 6/30):**
Pick your time period in 2020 of at least 4 continuous weeks from February 1 through June 30. If desired, record your selected start and end dates in the first column (“calendar date in 2020”) of the blank table below. Using this scratch table is optional; it may assist you in determining the correct dates each year for crab revenue calculation.
2. **Calculate all fishery revenue for that period in 2020:**
Calculate your revenue from all eligible fishing activity from the start through the end dates for that period in 2020.
3. **Calculate non-crab revenue for the same period in each of the 5 prior years:**
Calculate any non-crab fishery revenue for the same calendar dates in each year from 2015 through 2019.
4. **Calculate crab revenue for the corresponding “Crab Season Days” in each of the 5 prior years:**
 - a. Translate the start and end dates of your selected period in 2020 into “crab season days” by using the Crab Season Day Table appended to these instructions below.
 - b. In the Crab Season Day table, find your 2020 start date in first column (“2019-2020 (Dec 31)”)”
 - c. Follow that row to the right to find your starting crab season day and the corresponding calendar date in each of the past five years. For the 16-17, 17-18, and 18-19 seasons when areas within Oregon opened on different dates, use the dates for the area in which you first fished for crab that year. Record the starting crab season day and corresponding calendar dates for each year in the scratch table below.
 - d. Repeat step 5 for your 2020 end date, and record the resulting ending crab season day and corresponding calendar dates for each year in the scratch table below.
 - e. Calculate your crab revenue in each year from fish tickets for the calendar dates that correspond with your selected crab season days (i.e., from the starting through the ending calendar dates you recorded in the scratch table for each year).
5. **Calculate your total fishery revenue in each of the 5 prior years:** Add your non-crab revenue and your crab revenue for each year.
6. **Calculate your average fishery revenue over the 5-year comparison period:** Add the revenue totals you calculated for each year in step 5 together, and divide by 5. This is the number you will compare to your 2020 fishery revenue.

1. Crab Season Day scratch table

	calendar date in 2020	Crab Season Day	calendar date in 2019	calendar date in 2018	calendar date in 2017	calendar date in 2016	calendar date in 2015
Start							
End							

Example:

1. John Doe chooses March 1 – March 31, 2020 as the period that best reflects COVID-19 impacts on his fishing revenue.
2. John calculates his total fishing revenue from that period in 2020 by summing his revenue on fish tickets for all commercial fish landings for those dates.
3. For landings of all species except Dungeness crab, John calculates fishing revenue in each year from 2015 through 2019 by summing fish ticket values for landings for the same calendar dates in each year.
4. For Dungeness crab, John uses the Crab Season Day table to find his selected start and end dates (March 1 and March 31) in the first column (2019-2020 season), and follows them to the right to find the corresponding crab season days and then the calendar dates for each year. Since John always began fishing south of Cape Arago and Cape Blanco, he uses the dates for those areas. John's table looks like this:

	calendar date in 2020	<i>Crab Season Day</i>	calendar date in 2019	calendar date in 2018	calendar date in 2017	calendar date in 2016	calendar date in 2015
Start	3/1/2020	62	4/3/2019	4/9/2018	2/17/2017	3/5/2016	1/31/2015
End	3/31/2020	92	5/3/2019	5/9/2018	3/19/2017	4/4/2016	3/2/2016

5. John calculates his crab revenue for each year from 2015 through 2019 by summing fish ticket revenue for all crab landings for the calendar dates for each year in the scratch table.
6. John calculates his total revenue for the comparison period in each year by adding the non-crab revenue calculated in step 3 and the crab revenue calculated in step 5, for each year from 2015-2019.

For questions on crab season day translation **ONLY**, please contact:
